(57) Abstract :

PHARMACEUTICAL COMPOSITIONS FOR TREATMENT OF ALOPECIA • ABSTRACT The present invention describes a combination of a compound Minoxidil and Basic Fibroblast Growth Factor (bFGF). The formulation is preferably in a topical form. The topical pharmaceutical composition comprises a therapeutically effective amount of the Minoxidil of formula (I) and Basic Fibroblast Growth Factor (bFGF) which is a decapeptide of the Basic Fibroblast Growth Factor (bFGF) class, optionally with at least one suitable pharmaceutically acceptable agent selected from suitable carriers, diluents, vehicle or other excipient. The present application relates to use of the pharmaceutical composition for the treatment or prevention of a suitable disease or condition, such as alopecia. The invention also describes the preparation of such compositions.
